

Introducing Renfinity's Secure Grid Smart Card Solution TWIC Card Integrations

We want the name "Secure Grid" to be synonymous in your mind with cybersecurity. More than synonymous--we want them to be one and the same. In fact, when you think "cybersecurity," "physical security," "monitoring," or "reliability", we want you to think "Secure Grid."

It is our pleasure to introduce our **Secure Grid Smart Card**. Renfinity (renfinity.com) and our partner, Bluvision (bluvision.com) focus on our customers, listen to the issues and challenges, and finally meet those challenges with products, services, and resources unmatched in quality and functionality.

The NEW Secure Grid Smart Card Product is the most powerful we have ever built.

- Cybersecurity Common Access Card (CAC) Authentication Protocols
- Unique Identification Authentication
- Cyber Secure TWIC Card Integration
- Staff and Visitor Secure Physical Monitoring
- Real-Time Locating System integration
- Panic Alert Button Notifications
- Bluvision Innovation and Support

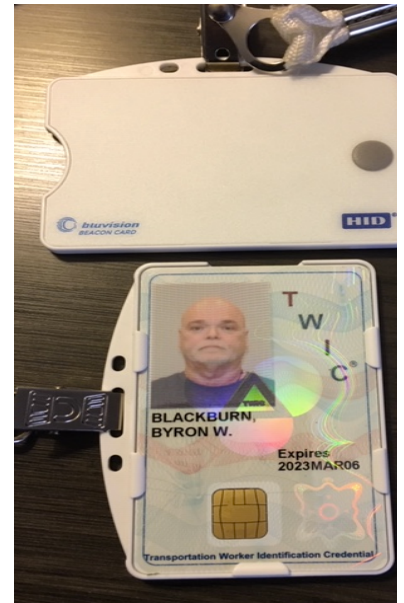

And that's just the beginning. Take a moment to discover the new Secure Grid Smart Card product. We are committed to your satisfaction and welcome your feedback. We'll do all we can to make your Secure Grid experience a positive one.

About Renfinity, Inc. (www.renfinity.com)

Renfinity designs, manufactures and integrates asset management, wireless communication products and specialized industry solutions for organizations, its strength being specialized solutions that are highly integrated and scalable for asset management, access control and breach detection.

About Bluvision, Inc. (www.bluvision.com)

Bluvision is leading innovation in the IoT space as market leaders in sensor beacons, Real Time Location Systems (RTLS), cloud connectivity providing remote, worldwide beacon deployment, fleet, workflow and event management. Bluvision simple architecture provides enterprises scalable solutions for Asset Monitoring for location, health and performance.
